

Software engineer with 5+ years of experience building high-quality digital solutions. Specializing in .NET and modern frontend frameworks, I build scalable web applications and architect robust backend systems. Currently finishing a Master's degree in Computer Engineering while directing Minimalist, a software development agency focused on delivering innovative solutions and technical consulting services.

CONTRACTS

Factory X Pribislavec OCT 2025 MAY 2026	Construction Workforce Management Platform Owned the full stack of a platform running day-to-day site operations — crew scheduling, equipment tracking, live field reporting — from the Vue/Quasar client to a .NET API orchestrated with Aspire. Site data now reaches the office the same day, so foremen re-plan against real progress. Vue.js · Quasar · .NET Web API · Aspire · MS SQL Server · SignalR · Identity · EF Core · Quartz.NET · Azure Storage
King ICT Buzin MAY 2025 AUG 2025	User Management System Delivered the identity and access surface of a microservice-based technical protection ecosystem — role-based permissions, account lifecycle and audit-ready history, in Blazor against a GraphQL gateway. Operators got one place to grant and revoke access across services that each had their own admin path. .NET Blazor · Syncfusion · Strawberry Shake · bUnit · xUnit · Moq
King ICT Buzin FEB 2025 MAY 2025	Visitor Announcement System Designed and built the visitor pre-announcement module of a technical security platform — web app and REST API against the vendor SDK that issues credentials at the gate. Hosts register visitors ahead of arrival, so reception verifies instead of enrolling and every entry is tied to a named host. .NET Blazor · MudBlazor · .NET Web API · MS SQL Server · Dapper
Infinum Zagreb FEB 2024 FEB 2025	Creator–Fan Social Platform Co-developed a subscription social platform — paid feeds, SendBird messaging, media on Azure Storage — and owned the back office: admin and agent dashboards for onboarding, moderation and support, letting staff resolve creator issues without engineers. .NET MVC · .NET Web API · PostgreSQL · EF Core · jQuery · Bootstrap · Azure AD B2C · SendBird · Firebase · Azure Storage · xUnit · NSubstitute
Infinum Zagreb OCT 2023 FEB 2024	Sport Events Management System Sole backend engineer on the REST API behind a mobile sports app: event hosting, capacity rules, participant history and performance tracking. I agreed the contract with the iOS and Android teams up front and shipped ahead of client work, so both integrated against a stable surface. .NET Web API · PostgreSQL · EF Core · Azure AD B2C · xUnit · Moq
Infinum Zagreb APR 2023 OCT 2023	Blood Donation Coordination Hub Built the API and admin dashboard for a donation platform: centre directory, appointment scheduling, donor history and eligibility-aware notifications. Centres publish their own slots and donors are invited only once eligible again, replacing a phone-and-spreadsheet process. .NET Blazor · .NET Web API · PostgreSQL · EF Core · Identity · Bootstrap · Firebase · SendGrid · xUnit · Moq
Infinum Zagreb MAY 2022 APR 2023	Installation Management Network Engineered the network connecting manufacturers, retailers and installers: work-order tracking, installer matching, document handling and the admin dashboard operating it. Work orders moved from email threads to a tracked state machine with a visible owner. .NET MVC · .NET Web API · PostgreSQL · EF Core · Identity · jQuery · Bootstrap · Firebase · SendGrid · Azure Storage · xUnit · Moq
Enterwell Zagreb MAR 2022 MAY 2022	Conference Device Management Tool Built a WPF client wired to a central web dashboard over SignalR, monitoring conference hardware live during events. One operator could see every room from the desk and catch a failed device before the session started. .NET WPF · MS SQL Server · SignalR
Enterwell Zagreb FEB 2021 MAR 2022	Technical Security Solution Worked across the web and desktop dashboards of a physical security platform — IoT devices, video streams, access control — on React and .NET with SignalR carrying device and alarm state. Cameras, controllers and alarms came into one operator view, handled from a single screen. React.js · Material UI · .NET MVC · .NET WPF · .NET Web API · MS SQL Server · EF · Identity · SignalR · xUnit · Moq

SKILLS

Frontend	PROGRAMMING LANGUAGES	JavaScript · TypeScript · C# · HTML · CSS
	FRAMEWORKS	React.js · Vue.js · .NET Blazor · .NET MVC · .NET Razor Pages
	LIBRARIES	Tailwind CSS · Material UI · MudBlazor · Bootstrap
	TESTING	xUnit · NSubstitute · Selenium
Backend	PROGRAMMING LANGUAGES	C#
	FRAMEWORKS	.NET Minimal API · .NET Web API
	LIBRARIES	EF Core · Identity · MediatR · SignalR · Azure Storage · Firebase
	TESTING	xUnit · NSubstitute · Moq
Architecture	SYSTEM	Modular monolith · Microservices · Event-driven
	SOFTWARE	Clean architecture · Domain-driven design · REST · Layered architecture
Infrastructure	DEVOPS	GitHub · GitLab · Aspire · Docker · Azure · SonarQube
	DATABASE	SQL · PostgreSQL · MS SQL Server
Paradigms	DESIGN PATTERNS	DI · CQRS · MediatR · Repository · Unit of work · Factory · Singleton
	DESIGN PRINCIPLES	SOLID · KISS · YAGNI · DRY
	METHODOLOGIES	Agile · Scrum · Kanban
Tools	DEVELOPMENT	Rider · WebStorm · DataGrip · VS Code · Postman · Claude Code
	PRODUCTIVITY	Notion · Google Workspace · Figma
	OPERATING SYSTEMS	macOS · Linux · Windows

PERSONAL PROJECTS

OrderPoint	Restaurant Ordering Platform Guests scan a QR code at the table to browse the menu and order live, staff work the incoming queue, and owners edit restaurant data in real time — one Aspire-orchestrated system instead of a tablet, a printer and a phone call. .NET Blazor · .NET Minimal API · Aspire · PostgreSQL · MudBlazor · MediatR · EF Core · FluentValidation · Scalar · OpenTelemetry github.com/mucnjakf/OrderPoint
Codex	Developer Publishing Platform A publishing space built for technical writing — structured authoring, a reading experience that respects code, and monetisation for the author rather than the platform. React.js · .NET Minimal API · PostgreSQL · Aspire · TanStack Start · Axios · Shadcn UI · EF Core · MediatR · FluentValidation · OpenTelemetry · Scalar github.com/mucnjakf/Codex
Herculean	Fitness & Nutrition Platform Workout tracking, meal and macronutrient logging, goal setting and progress analytics in one place — the four apps most people juggle collapsed into a single record. React.js · .NET Minimal API · PostgreSQL · Aspire · TanStack Start · Axios · Shadcn UI · MediatR · EF Core · SignalR github.com/mucnjakf/Herculean

EDUCATION

2022	Professional Master in Computer Engineering
PRESENT	Algebra Bernays University, Zagreb
	Advanced C#, Java, Python & JavaScript · Software design · DevOps · Data analysis
2017	Bachelor in Software Engineering
2022	Algebra University College, Zagreb
	Object-oriented programming · Web technologies · Mobile development · Computer networks · Project management
2019	Microsoft Technology Associate
	Software Development Fundamentals · Database Administration Fundamentals · Introduction to Programming using HTML and CSS
